Java Backend Developer with 4 years of experience building secure, scalable enterprise applications across banking, financial services, and healthcare domains. Strong experience in developing REST APIs using Spring Boot, working on microservices-based systems, and handling production scenarios including issue resolution, deployments, and cross-team coordination. Experienced in end-to-end feature delivery, from requirement discussions to production support.

TECHNICAL SKILLS

Primary Skills: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, JDBC, RESTful APIs, Microservices, Lombok, JUnit, Mockito, MySQL, LDAP

Secondary Skills: HTML, CSS, JavaScript, Angular, Thymeleaf, AWS, OpenShift, Docker

Tools & Platforms: IntelliJ IDEA, VS Code, Maven, Git, Postman, JIRA, SQL Developer, GitHub Copilot

---

PROFESSIONAL EXPERIENCE

Infosys Limited | Kolkata, India **August 2024 – Present**

Senior Associate Consultant

Projects: Banking Customer Care Application - Fiserv

- Worked on a high-availability enterprise banking application serving multiple banks across EMEA and APAC regions, designing and enhancing RESTful APIs using Java, Spring Boot, JDBC, and SQL to handle complex banking workflows, and maintaining UI components using Angular to support seamless integration with backend services.
- Implemented business role management and function-level access configuration, enabling Maker–Checker (user–manager) approval workflows — gaining practical experience in handling approval-based processes and role configurations in a multi-bank setup.
- Involved in end-to-end feature delivery by working closely with business analysts, handling requirement discussions, development, testing, and supporting deployment to ensure timely releases across clients.
- Worked on enhancing APIs related to user and access management, including functionalities like user creation and role handling, and integrated SailPoint APIs while working with LDAP-based systems.
- Supported deployment activities as part of regular development work using Jenkins pipelines, Kubernetes, and Argo, and contributed to release processes by preparing release summaries and related documentation in coordination with relevant teams.

Associate Consultant

Projects: Customizable Paystub Application - Fiserv

- Worked on redesigning and migrating a legacy Paystub system to a Spring Boot microservices architecture, improving modularity and enabling multi-organization support using JPA and Hibernate.
- Developed secure admin and user portals using Thymeleaf, implementing authentication and authorization using Spring Security, and integrating external APIs via Apigee for secure communication between systems.
- Handled production issues, bug fixes, and system enhancements in legacy modules, ensuring smoother functioning and better stability of the application.
- Collaborated with cross-functional teams for requirement understanding and implementation, and supported deployment activities using Docker and OpenShift within enterprise CI/CD environments.

Cognizant Technology Solutions | Kolkata, India **July 2022 – July 2024**

Programmer Analyst

Projects: Healthcare Claim Settlement Portal – Inspira Financial

- Worked on building Spring Boot REST APIs for a healthcare claim settlement platform, automating end-to-end claim workflows and integrating financial and reimbursement data into a unified system.
- Designed and implemented data persistence using JPA and Hibernate, managing relationships between claims, account balances, and audit records while ensuring data consistency.

- Contributed to developing scalable and maintainable backend services with clear API structure and modular design, making the system easier to extend and debug.
- Wrote unit and integration test cases using JUnit and Mockito, helping reduce regression issues and improving overall code reliability during releases.

EDUCATION

Bachelor of Technology – Computer Science Engineering **August 2018 – June 2022**
Bengal Institute of Technology (Techno India), Kolkata
CGPA: 9.16

ACHIEVEMENTS & CERTIFICATIONS

- Infosys Insta Award – Recognized for effective execution and critical support on a client project.
- Client Appreciation Certificate – Awarded for timely delivery and strong collaboration during a high-priority project phase.
- AWS Certified Cloud Practitioner
- Spring Security Fundamentals – Udemy
